

Pinpoint Precision: The Most Accurate Speed Limit Data at Your Fingertips

Give us a spot on the map, and we'll give you the world's most precise posted-speed-limit data. SpeedGauge data delivers unmatched accuracy – driving smarter decisions and safer operations – everywhere you drive.

For over a decade, leading fleets and telematics providers have relied on SpeedGauge for the best available speed limit data. This vital data is now available to you as SpeedMap PRO™.

Features:

- High performance and scalable delivery
- Worldwide coverage
- RESTful API
- End-user feedback loop for rapid and continuous quality improvement
- Supports private speed limits and policies

With SpeedMap PRO you can build:

- White label speed reporting
- Driver scorecards
- BI Analytics
- Add-ons to existing operational or safety metrics

Telematics service providers, location analytics companies, large fleet operators, insurance carriers and others can now rely on SpeedMap PRO data for optimizing operations, driver coaching, loss prevention, risk and claims analysis, underwriting and more.

Data Packages

Base Package – LEGAL POSTED SPEED LIMITS:

High-quality speed limit data to support reports, alerts and analytics for driver coaching and incentive programs.

Tier 2 Package – COACHING ATTRIBUTES:

Improves the impact of in-person driver coaching by providing enhanced context for coaching when combined with Base Package data.

Tier 3 Package – RISK EXPOSURE ATTRIBUTES:

Contextual road risk data highlights which drivers are most at risk based on where they drive.

Build faster, build better with SpeedMap PRO!
